## **NOTICE**

This is a common important notice to all the students and their parents who are persuing 12<sup>th</sup> Science in Rajarshi Shahu Jr. Science College, Latur.

During the period of lockdown, we have been uploading everyday two video lecturers of each topic and in total six video lecturers of three topics of three different subjects. But now as per the new notification of the Maharashtra Government regarding the re-opening of Schools and Jr. Colleges, the new strategy about the online and offline classes is to be followed.

As the Government has directed to re-open Schools and Jr. Colleges with it's 50 % capacity (considering the consent or willingness form duely signed by parents), the college has decided to change the schedule of uploading the video lecturers.

As per the new strategy, everyday, six video lecturers will be uploaded, the only change is of six videos of six different topics. The students who have opted for offline classes may attend four periods which include Bifocal (Crop Sci, Fish. Sci., Crop Prod., Elect., Comp.Sci.), English, Physics & Chemistry each whereas they can watch the remaining four videos of four different topics at home.

The students who have not duely signed and consented and decided to stay with online teaching only, will be given six videos of six different topics (instead of six videos of three topics). Additionally the videos of English will be uploaded twice in a week. The video lecturers of Bifocal subjects will be uploaded after the completion of syllabus of the main subjects.

With this decision we think that we can be judgemental to all the students who are completely online or who are partly offline and partly online.
